Celebrate Earth's Most Treasured Material

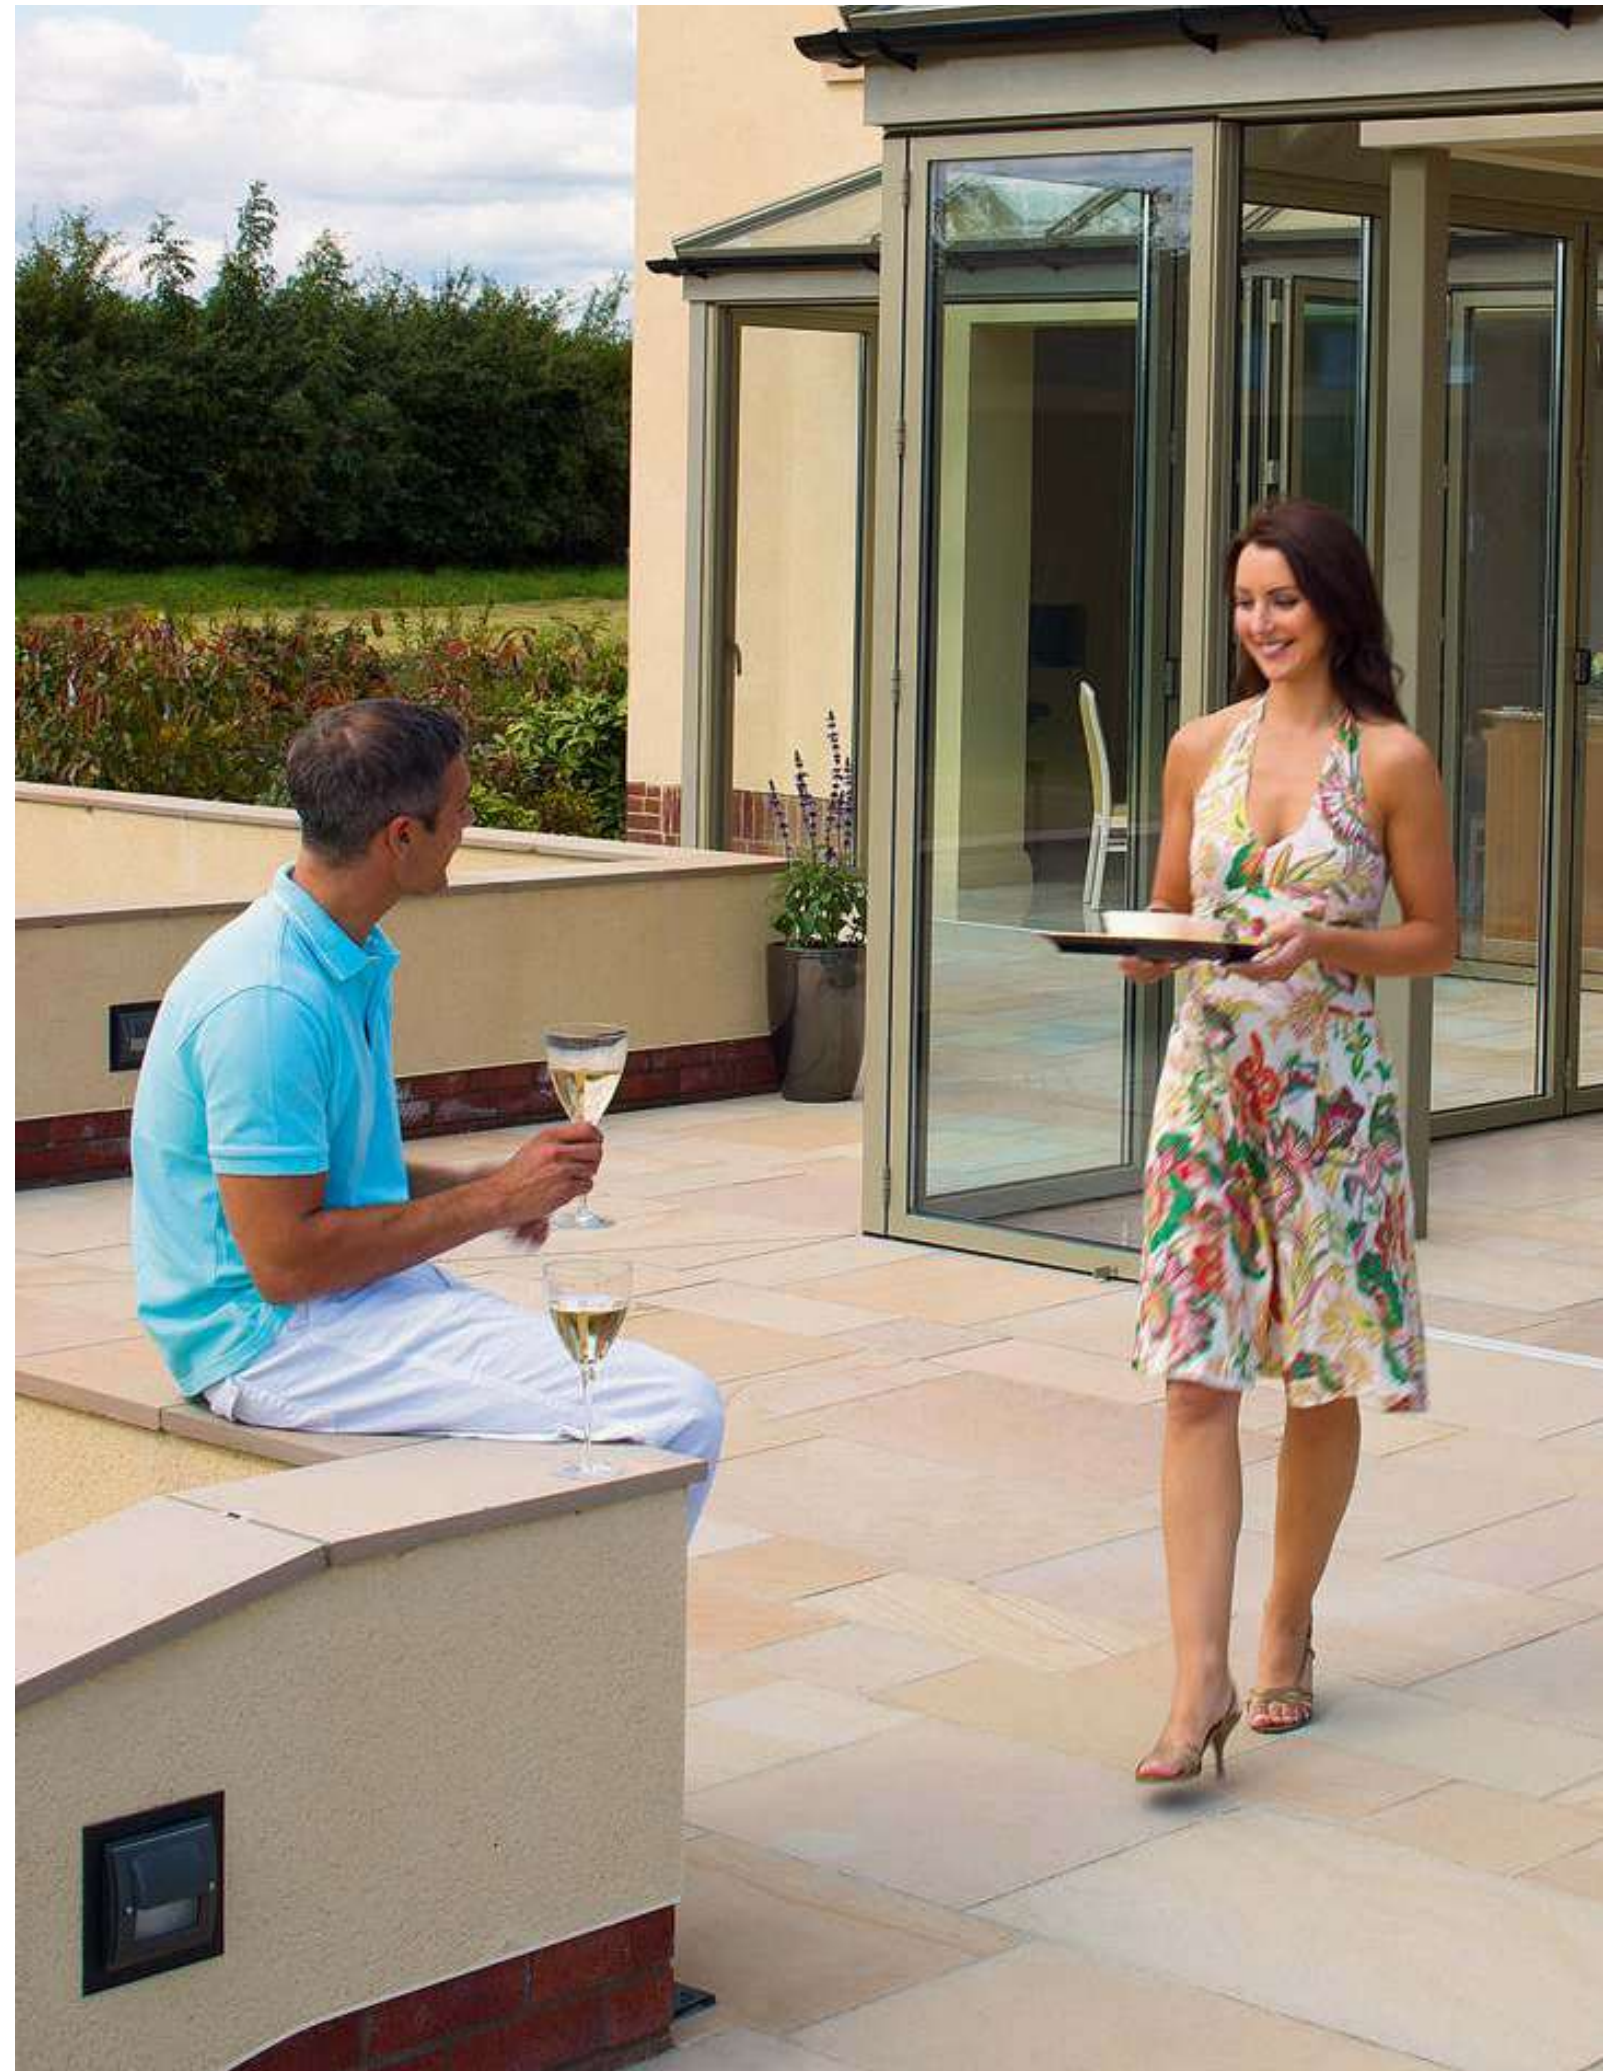

Beautiful, resistant and versatile

Natural stone is a precious material that has been treasured by humans for centuries.

Its beauty, durability, and versatility make it an ideal building material.

Formed over 300 to 500 million years ago, natural stone is a testament to Earth's craftsmanship. It has stood the test of time and continues to offer a diverse range of options for creating an eco-conscious lifestyle.

Natural stone has always been a part of human history and we celebrate its unique qualities. At our company, we strive to bring the beauty and durability of natural stone to as many people as possible.

At LivingStone, our goal is to make natural stone the star of innovative and functional architecture. We strive to make it the top choice for architects, interior designers, and homeowners.

Our company was founded with a focus on innovation and entrepreneurship, and for the past three decades, we have remained dedicated to seeking out and implementing new ideas and solutions.

We have a network of over 250 quarries of sandstone, limestone, granite, schist, and basalt and we specialize in manufacturing and processing all types of natural stone.

Our operations are powered by technology and specialized equipment, which allow us to consistently deliver high-quality products to our customers. Every stone slab is processed, manufactured, and tested to the highest global standards.

LivingStone is known for its reliable and timely distribution. Our products have been used in a variety of residential and commercial projects in the USA, UK, Germany, Australia, New Zealand, India and many more countries for over 30 years.

We have an international ethos and embrace a culture of exploration in all aspects of our business, setting a model for other stone suppliers.

Choose Us

● Understanding the Needs of the Architects

Architects are constantly seeking new materials and finishes that can enhance the aesthetic appeal of a project while also meeting functional and performance requirements. We work closely with them to understand their specific design goals. Our team is available to offer technical support throughout the design and construction process.

● Technology & Innovation

At LivingStone, we understand the importance of innovation and technology. Our cutting-edge machinery and advanced manufacturing processes allow us to produce high-quality natural stone products that meet the needs of architects. Our commitment to innovation also means that we are always seeking out new ways to improve our products and processes.

● Expansive Source Base

As a natural stone manufacturing company with an expansive network of quarries, we are able to offer a wide range of sandstone products to architects and distributors. This diverse selection allows our customers to choose from a variety of colors, textures, and finishes, giving them the flexibility to find the perfect product for their needs.

● Global Distribution Network

At LivingStone, we have built a reputation as a trusted provider of high-quality natural stone products for over 30 years. With a global distribution network spanning the USA, UK, Germany, Australia, New Zealand, and many other countries, we are dedicated to ensuring that our customers have easy access to our products no matter where they are located.

Our Vision – Then & Now

At LivingStone, our passion for research, innovation, and sustainability drives everything we do. We are dedicated to making natural stone an integral part of an eco-luxurious lifestyle and are honored to bring the imaginative designs of designers and architects to life.

To achieve our vision, we constantly invest in state-of-the-art machinery, equipment and upskilling our workforce, all while staying true to traditional values. This commitment to excellence enables us to meet the highest expectations of our customers, industry peers, and ourselves. of our customers, industry, peers and ourselves.

Business With A Heart

At LivingStone, our approach to business is guided by a strong sense of purpose and a commitment to doing good.

In addition to our commitment to sustainable production practices that minimize our impact on the environment, we are focused on the growth and development of the community around us. We have partnered with social outreach programs that aim to create awareness about menstruation hygiene management in rural areas and provide additional educational resources to students who are at the risk of dropping out.

Awards & Recognition

Capexil, Special Export Award

2001 - 2002 - 2003 - 2004 - 2005 - 2006 -
2007 - 2011 - 2013 - 2014 - 2015 - 2016 - 2017

Conferred to honour and encourage individual firms who have taken great initiative in developing exports from India for products falling within the purview of Capexil.

Capexil, Certificate of Merit

2008 - 2010 - 2012

Presented to export houses who make exceptional and consistent effort in developing exports from India within the purview of capexil.

Concor, Exim Star Award

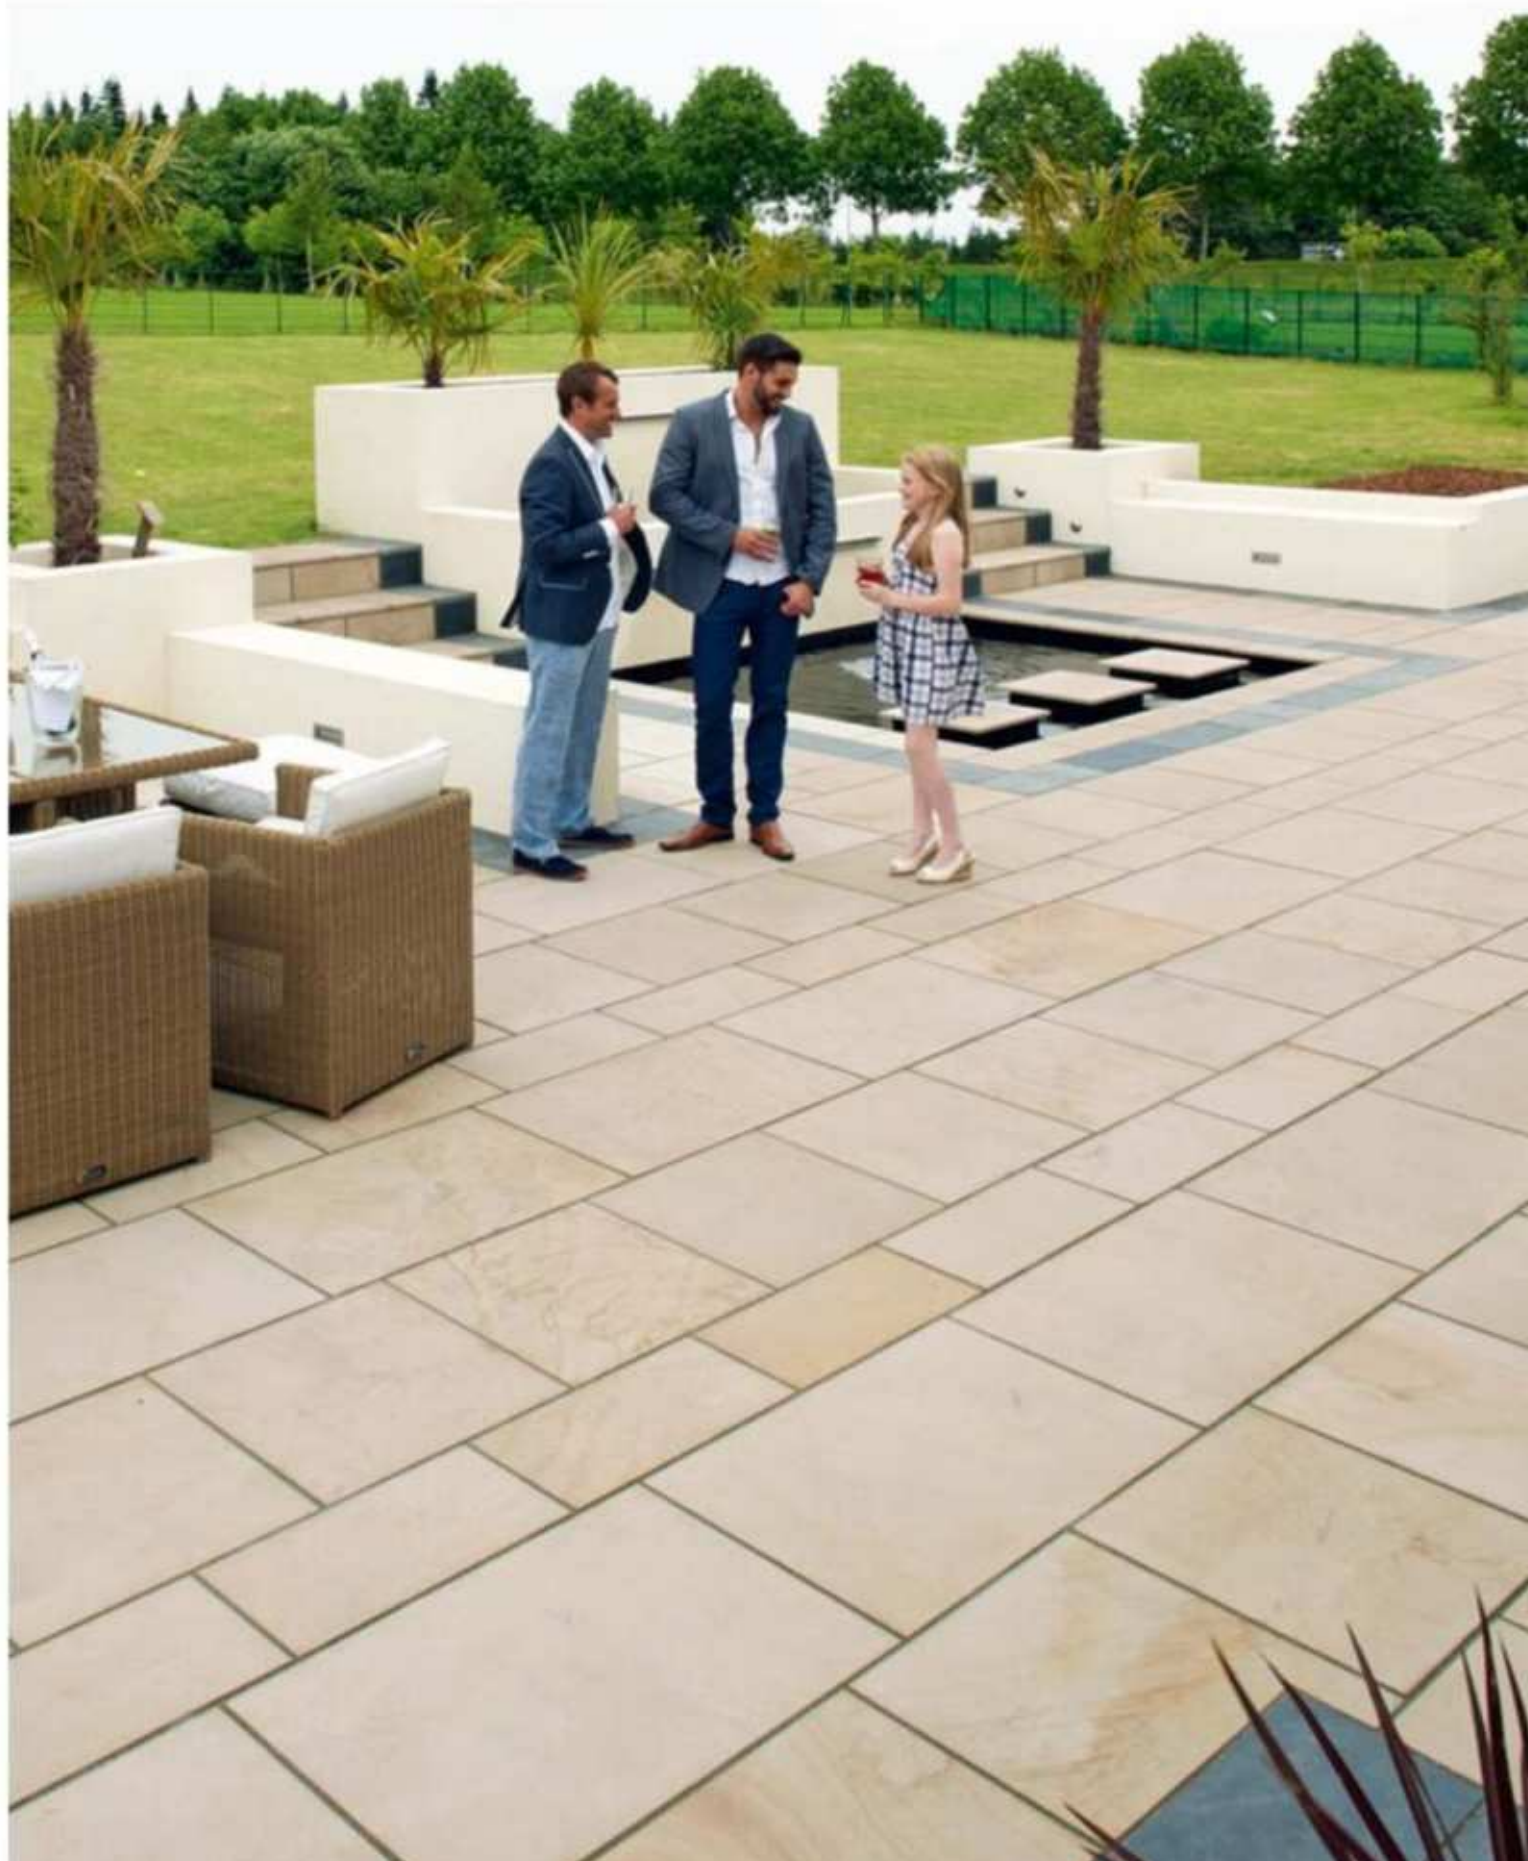

2011 - 2012 - 2013 - 2017

Awarded 2nd and 3rd positions over the years in the special award category for north central region. Also conferred the 'Financial Performance Exporter' in 2013.

Living With Stone

Connect with the Earth through Natural Stone

Experience the timeless elegance of natural stone

As a natural material that has been shaped over time by the earth, natural stone brings the beauty of the outdoors into your home. Its unique patterns, colors, and textures reflect the diversity of the natural world, creating a sense of harmony between your home and the environment.

Natural stone can be used in a variety of applications, such as countertops, backsplashes, and flooring, allowing you to incorporate it into different areas of your home. By choosing natural stone, you can bring a touch of the natural world into your home and feel truly connected to nature.

Earth's Artistry

Natural stone is a product of the earth, formed over millions of years through the natural processes of erosion, weathering, and tectonic activity.

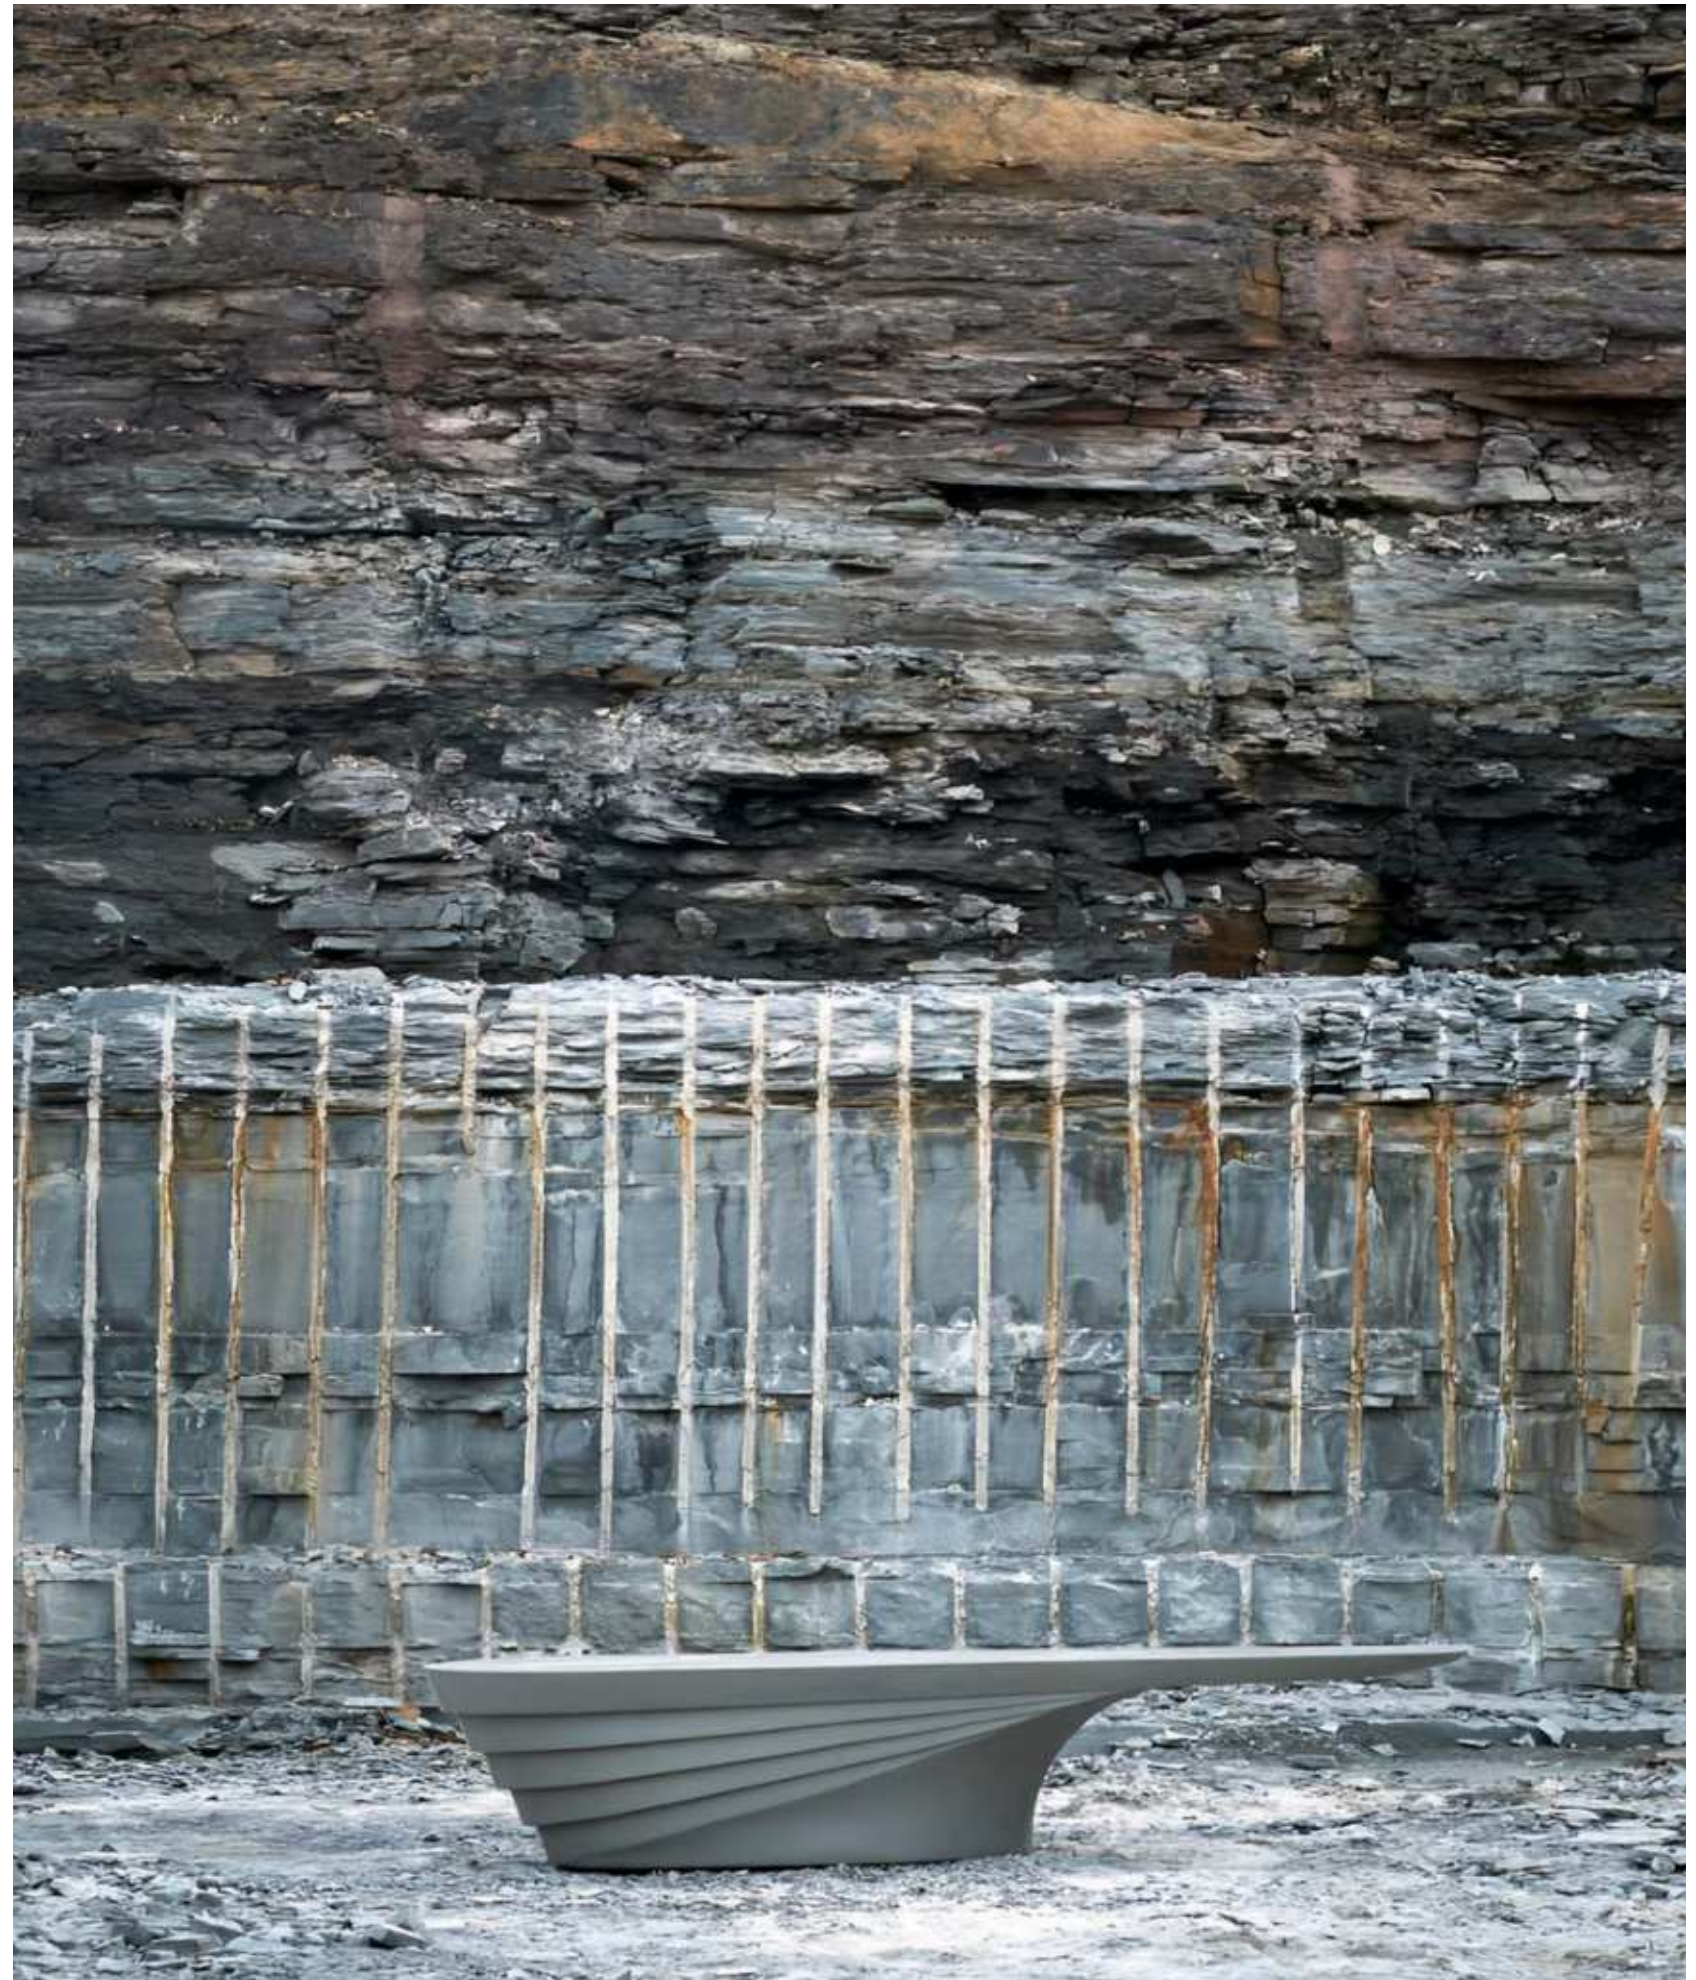

It represents the artistry of the earth itself, with its unique patterns, colors, and textures reflecting the diverse beauty of the natural world.

The creation of natural stone involves a delicate balance of geological forces that shape the earth's surface. From the deep layers of the earth, where heat and pressure create metamorphic rocks, to the surface, where sedimentary layers are exposed to the elements and transformed over time, natural stone is a testament to earth's artistic power.

Our Artistry

Combining the outstanding range of colours, textures, and hard-wearing properties of natural stones with state-of-the-art technology, our company has been able to give shape to visionary architectural projects.

LivingStone's range of sandstone and limestone has been extensively used in notable heritage sites and public spaces like the impressive O2 Arena, National Memorial Arboretum and Liverpool Limestone Station in the United Kingdom, amongst others across the globe. Our high-quality stones with unique finishes have empowered home owners and architects to offer innovative design solutions in both boutique and large-scale projects.

Our Impressions Across the Globe

Elevating Residences

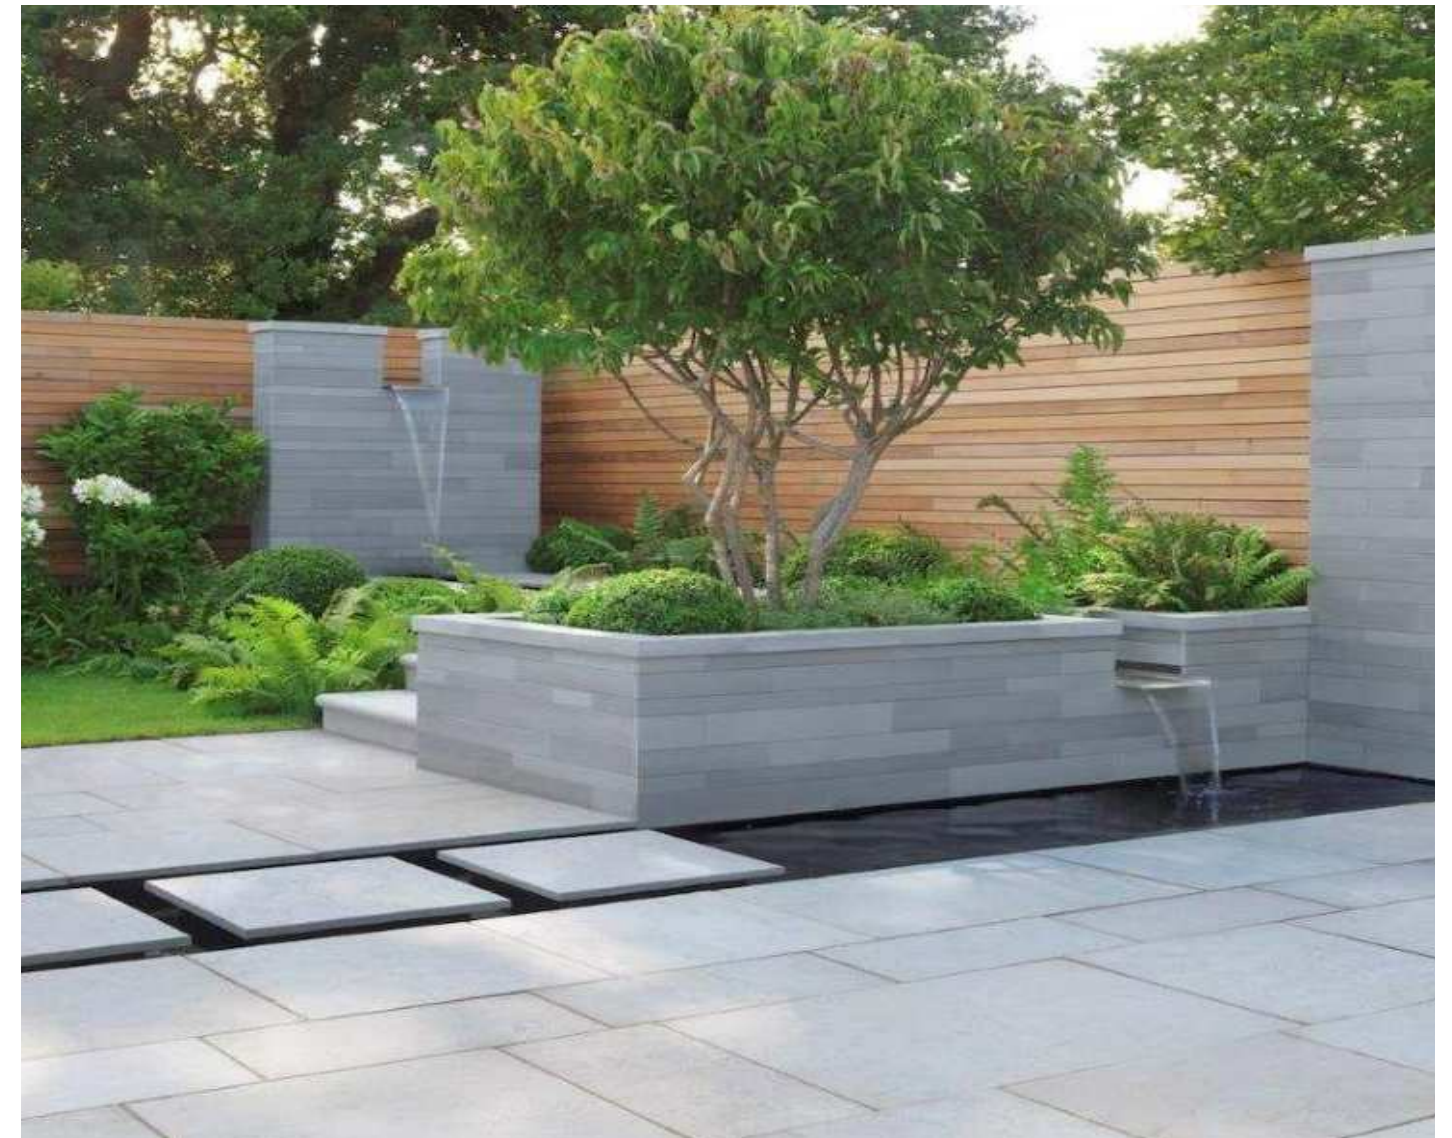

Enhance your home's beauty with the timeless elegance of natural stone

The use of natural stone as paving, walling, or driveway cubes can greatly enhance the beauty and sophistication of any residence. Its timeless elegance and durability make it a perfect choice for both outdoor and indoor surfaces, able to withstand the elements and requiring only minimal maintenance to maintain its stunning appearance.

But natural stone offers so much more than just practicality; it also provides the opportunity to reflect the character and personality of the homeowner. With a vast array of colors, textures, and finishes available, natural stone can be customized to perfectly suit the individual style and taste of the homeowner. Whether you desire a rustic, natural look or a more polished and refined aesthetic, natural stone can be used to create a truly unique and personalized outdoor space.

Incorporating natural stone into your home's exterior design allows for the creation of a stunning and functional outdoor area that exudes sophistication and class. Its versatility and beauty make it a truly exceptional choice for elevating the look and feel of any residence.

The possibilities of incorporating natural stone to a residential project are limitless.

Traditional Country Home

A traditional country home in northeastern USA that incorporates the use of brown sandstone as paving and coping is a perfect example of timeless and traditional architecture. The hand-split pavers, with their rustic and natural appeal, are extremely durable and able to withstand the harsh winters of northeastern USA, making them the ideal choice for this type of home. The sandstone coping creates a nice matching element, both in terms of color and texture, to the pavers and also serves a functional purpose.

The use of natural finish Brown Sandstone for paving, coping, and steps adds a timeless aesthetic to the surroundings.

Retractable Pool

White sandstone used around a retractable swimming pool in New Zealand creates a serene and elegant outdoor oasis. The white sandstone offers a clean and modern look that complements the surrounding landscape. The material is used as paving, coping, and also as a sun lounger. The pool coping protects the pool edge and provides an easy way to walk in or out of the pool, while the sandstone pavers are strong and slip-resistant, making them ideal for a pool area. This kind of detail of design and material choice makes the pool area a focal point of the outdoor living space, both in terms of aesthetics and functionality.

Elevated with Buff White Sandstone radial coping, pavers, and natural stone furniture, this pool boasts a stunning ocean view at high altitude.

Our Commercial Projects

LivingStone can supply large volumes of long-lasting, cutting-edge natural stone solutions with unparalleled excellence in craftsmanship and quality.

At LivingStone, we specialize in providing natural stone in customized sizes and finishes to meet any commercial need. This expertise has enabled us to contribute to a variety of large commercial and public projects globally for many years. Quality control is a key focus for us and all of our stones used in installations worldwide have passed rigorous inspections to meet international standards.

We take great pride in being a part of large town centers in Germany and prestigious commercial sites in the UK, where we have supplied natural stone that has helped to create beautiful and functional public spaces.

Bringing natural elegance to commercial spaces with LivingStone.

London International Quarter

An iconic commercial and residential development in London, known for its innovative design and use of natural materials. One of the standout features of the project is the use of sandstone, which was utilized in various areas throughout the development. The sandstone used in the project was cut into unique rhomboid shapes, creating a visually striking and modern look. The use of different colors of sandstone also helped to create a cohesive and visually interesting design throughout the development.

A blend of two colored rhomboid pavers brings vibrancy to this public space outside the West Ham United football stadium.

National Memorial Arboretum

The National Memorial Arboretum in the United Kingdom is an impressive and thought-provoking site dedicated to remembering those who have served their country. The project included the use of a double-coloured sandstone, which was carefully selected to complement the serene and contemplative nature of the memorial. The project also includes black sandstone setts which were used to provide a nice contrast against the lighter-colored sandstone paving and walling.

Black Sandstone setts, double-colored Sandstone paving, and steps imparts liveliness into this expansive landscape.

Our Bespoke Products

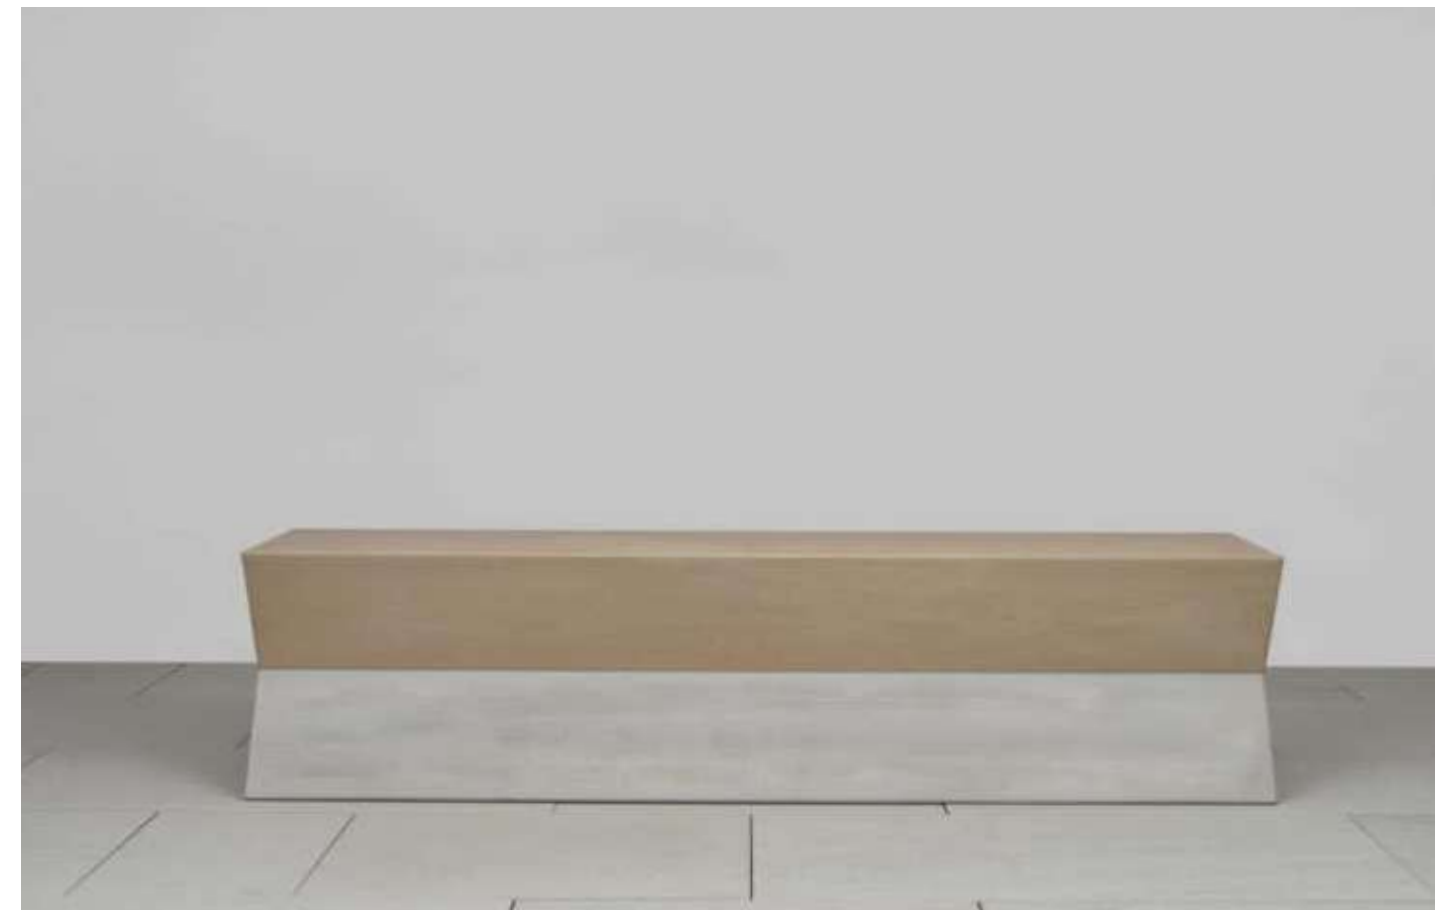

We pride ourselves on our ability to craft high-quality, one-of-a-kind products tailored to our clients' exact specifications.

We understand that every project is unique, and we work closely with designers to ensure that their bespoke natural stone products are exactly what they envision.

Our team of experts has extensive experience working with a wide range of natural stone materials, including marble, granite, limestone, travertine and quartzite. We use only the highest quality materials, carefully selected for their beauty, durability, and functionality.

Our state-of-the-art fabrication facility is equipped with the latest technology and machinery, allowing us to create precise and intricate designs with ease.

Bringing natural beauty to life, one bespoke piece at a time.

Naturalist Bench

A sandstone bench with a hand split base and a sawn surface serves as both a functional and decorative outdoor seating option. The base of the bench is split by hand giving it a rustic, natural look. The seat, however, has a smooth, sawn surface. This contrast between the rough base and the smooth top creates an interesting visual contrast and highlights the unique textures of sandstone.

The combination of machine sawn and hand-dressed SandStone in this bench creates a unique blend of traditional and modern aesthetics.

Sun Lounger

A sandstone Sun Lounger is a luxurious and durable piece of outdoor furniture that is perfect for relaxing in the sun. It's polished finish gives a smooth surface that is comfortable to lay on. The unique natural colour and textures of the sandstone give it an elegant and sophisticated look, making it a perfect addition to any outdoor living space such as gardens, patios or poolsides.

This monolithic furniture piece, expertly crafted for usability, enhances any outdoor space by adding functionality, making it ideal for swimming pool projects.

Journey of a Stone

From Quarrying to Delivery

The finished stone slab installed in a project goes through a rigorous journey of quarrying, cutting, finishing and packaging before its eventual application.

Quarrying

At our natural stone manufacturing company, quarrying is an integral part of our operations. It's the first step in the process of transforming raw materials into the high-quality pavers, slabs, and tiles that have made us a leader in the industry.

To meet the demand for our products, we use a staggering 30 million cubic feet of raw material annually. To ensure a steady supply of the finest materials available, we utilize both our own quarries and those of trusted partners.

We take great pride in the care and attention we put into every step of the quarrying and manufacturing process, from sourcing raw materials to delivering finished products to our customers.

Cutting

Whether it's the rough sides of hand-split stone or the smooth edges of sawn products, the attention to detail and accuracy of the cutting process is what sets LivingStone apart.

The first step in manufacturing sawn sandstone is the primary cutting stage. This involves the use of jumbo or multi blade block cutters to slice through rugged stone blocks, rough cutting them into slabs. The secondary cutting process involves the use of more precise machinery, such as laser guided bridge saws or CNC blades. These cutting processes allow for the creation of intricately detailed designs and perfectly sized pieces..

Finishing

The art of finishing is a crucial part of the production process, as it allows for the transformation of raw stone slabs into beautiful, functional works of art.

By offering a diverse selection of finishes from blasting to flaming, clear blasting to bushhammering, we are able to cater to the unique needs and preferences of our clients, ensuring that each product meets their exacting standards. Our dedication to world-class finishing is just one of the ways we strive to exceed our customers' expectations and deliver only the finest products and services.

Packaging

At LivingStone, we take great care to ensure that our packing meets the highest standards of quality and sustainability.

One way we stand out from our competitors is by using heat treatment chambers to fumigate our crates, rather than methyl bromide. This is a safer and more environmentally friendly option, as methyl bromide is a harmful chemical that can have negative impacts on both human health and the environment.

In addition to our commitment to sustainability through our fumigation process, we have also made efforts to minimize the amount of styrofoam and wood used in our packing.

Real-Time Communication

At LivingStone, we understand the importance of keeping our customers informed about the progress of their orders.

We are dedicated to providing a high level of transparency and service, and have implemented a thorough reporting system to ensure that they are always in the loop.

One part of the system is our quality checklist, which ensures we carefully check slabs at every stage of the production process. For bespoke projects, we go one step further by dry laying all the finished product, allowing customers to visualize how the final project will look. We create a detailed inspection report which allows customers to track the progress of their orders and feel confident that the final product will meet their expectations.

Technical Expertise With Quality at the Core

We pride ourselves on our technical expertise and commitment to quality. With over 37 years of experience in the natural stone industry, we have developed a deep understanding of the materials and processes involved in creating top-quality products.

Our team of skilled craftsmen and state-of-the-art machinery allow us to produce a wide range of products with precision and attention to detail. From cutting and finishing to packing and shipping, we take great care to ensure that every step of the process meets our high standards of quality.

Quality is at the core of everything we do, and we are constantly striving to improve and innovate. Whether we are working on a small residential project or a large commercial development, we are committed to delivering the best products and services to our customers. Trust LivingStone to provide the technical expertise and quality you need for your next natural stone project.

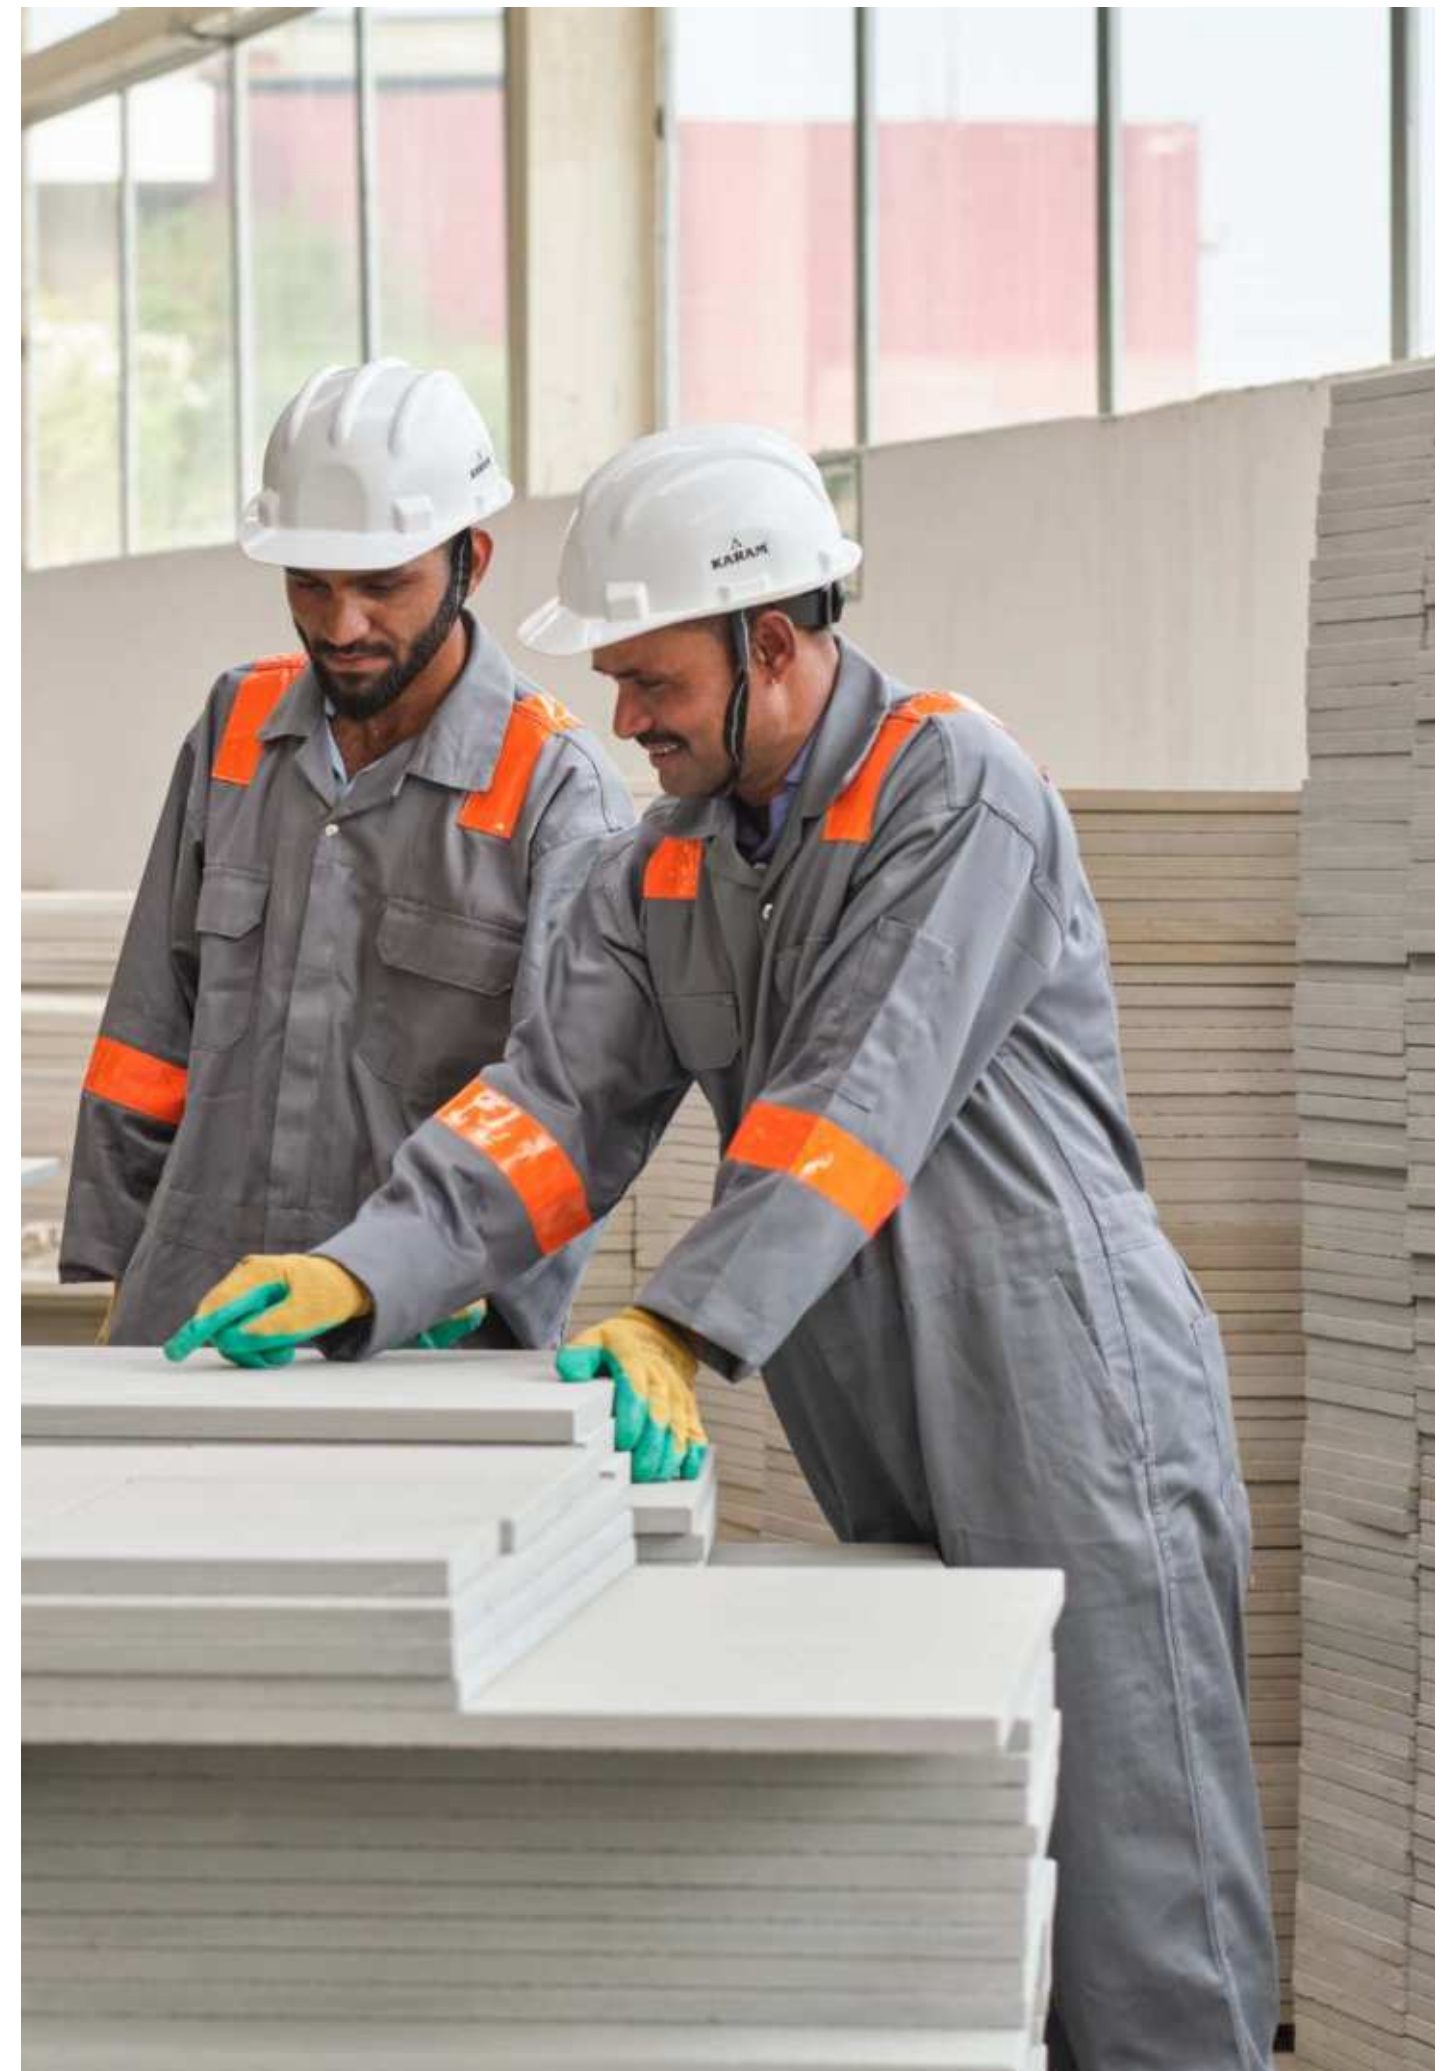

Quality and Compliance Certifications

We are committed to providing the highest quality natural stone products and services to our customers. To ensure that we are meeting the highest standards, we have obtained several quality and compliance certifications.

Our company is IMS certified, which demonstrates our commitment to quality management and continuous improvement. These certifications serve as a testament to our dedication to quality and compliance, and help to ensure that our customers can trust us to provide only the best products and services. When you choose LivingStone, you can be confident that you are getting the highest quality products that meet all necessary standards and regulations.

- Quality Management System ISO 9001:2015
- Safety Management System ISO 45001:2018
- Environment Management System ISO 14001

- ISO 45001:2015 - Certified with TUV SUD South Asia Pvt. Ltd.

State-of-the-Art Infrastructure

We are proud to have a state-of-the-art infrastructure that allows us to produce top-quality natural stone products with precision and efficiency. Our facility is equipped with the latest machinery and technology, including 5 axis wire profilers, bridge saws, jumbo block cutters and many more. This allows us to handle large volumes of stone with ease and maintain strict quality control at every stage of the production process. Our advanced infrastructure also enables us to respond quickly to customer needs and meet tight deadlines, making us a reliable partner for any project.

Safety Measures

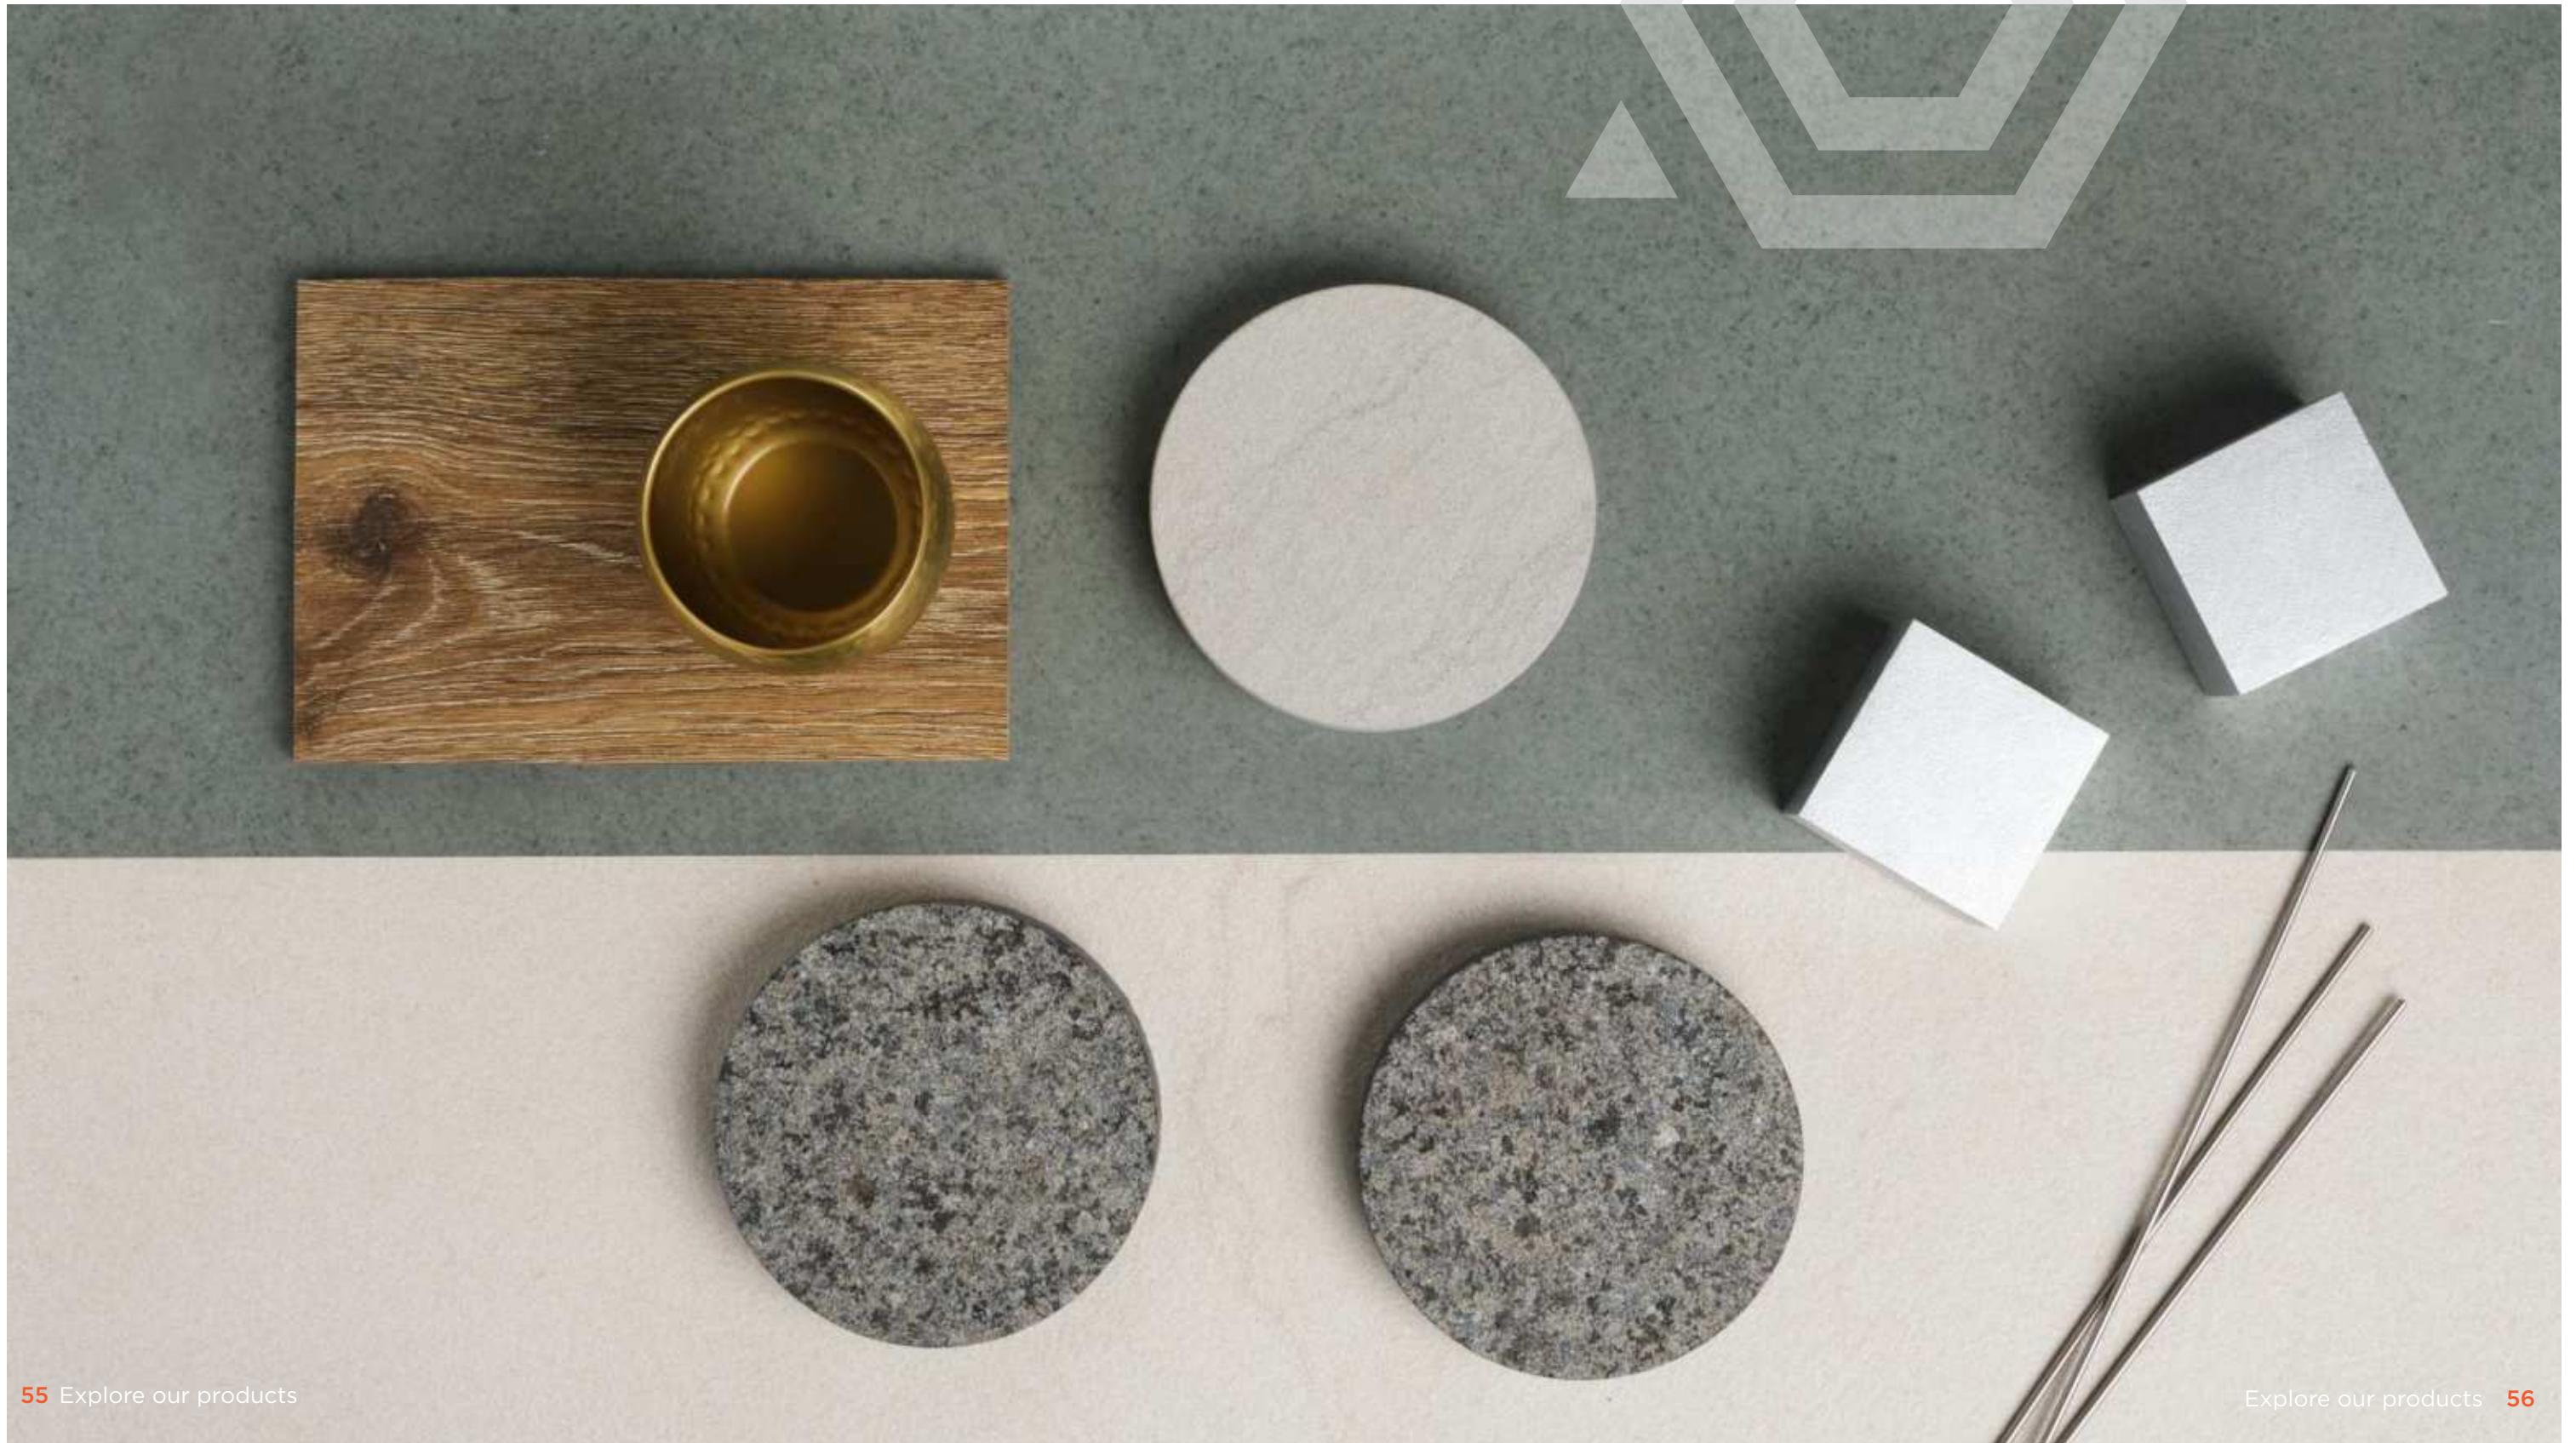

At LivingStone, the safety of our employees, customers, and facility is our top priority. We have implemented strict safety measures to ensure that our work environment is safe and compliant with all necessary regulations. These measures include conducting frequent safety training, providing safety gear and adding vacuum lifters to the shop floor, which help to minimize the risk of accidents and ensure that our facility is a safe place to work and visit. We are committed to maintaining the highest safety standards and constantly strive to improve and update our safety measures.

Quality Checks

Quality is of the utmost importance to our customers. That's why we have implemented rigorous quality checks at every stage of the production process to ensure that our products meet the highest standards. Our team of skilled craftsmen and state-of-the-art machinery allow us to produce a wide range of products with precision and attention to detail. We also have a thorough inspection process in place, including creating a detailed inspection report and dry laying products before dispatch for bespoke projects. By prioritizing quality and implementing strict quality checks, we are able to deliver products that exceed our customers' expectations.

Our Complete Range of Natural Stones

As a company, we're proud to offer a complete range of natural stones to meet the needs of any project. Our selection includes popular choices such as sandstone, limestone, granite and basalt, as well as more exotic options such as quartzite and schist. No matter what type of stone you are looking for, we are sure to have something that will fit your needs and preferences.

In addition to our wide variety of stone types, we also offer a range of finishes and edge treatments to suit your desired look. From blasted and clear blasted to bush hammered and antiqued, our cutting edge machinery and skilled craftsmen can create the perfect finish for your natural stone paving, walling, countertops, flooring, or other surfaces. We take pride in providing top-quality materials and expert craftsmanship to ensure that our customers receive the best possible product. Allow us to turn your vision into a stunning reality.

Get Inspired by Natural Stone

Truly an inexhaustible source of inspiration

Natural stone is a true treasure, offering endless inspiration for all kinds of projects. Its unique patterns, textures, and colors make it a versatile and beautiful choice for any space. Whether you are looking to add a touch of luxury to your home with granite countertops, or create a rustic, natural feel with hand split sandstone flooring, stone has the power to transform any room.

At LivingStone, we are passionate about the endless possibilities that natural stone provides. Our selection of natural stones is sure to spark your creativity and help you bring your vision to life. Let us help you discover the endless potential of natural stone and turn your inspiration into a stunning reality.

Why Natural Stone ?

For starters, natural stone is tough as nails (but way better looking). It can withstand just about anything life throws its way, from changing temperatures to heavy foot traffic. Plus, with a range of colors, patterns, and textures to choose from, natural stone is the ultimate chameleon. It can blend into just about any decor style, from modern and sleek to rustic and cozy. And let's not forget about natural stone's timeless appeal. Natural stone is eco-friendly. It's made from natural materials and doesn't require any artificial chemicals to produce, so you can feel good about using it in your home or business.

Durable

Natural stone's ability to withstand the daily wear and tear of life makes it a practical choice for flooring. Its resistance to scratches and volatile temperatures only adds to its impressive durability.

Versatile

Natural stone comes in a wide range of colors, patterns, and textures, making it suitable for any style or setting. Whether you are looking to create a traditional, modern, or rustic look, there is a natural stone to fit your needs.

Timeless

Natural stone has been used for centuries and never goes out of style. Its classic beauty and enduring appeal make it a timeless choice for any project.

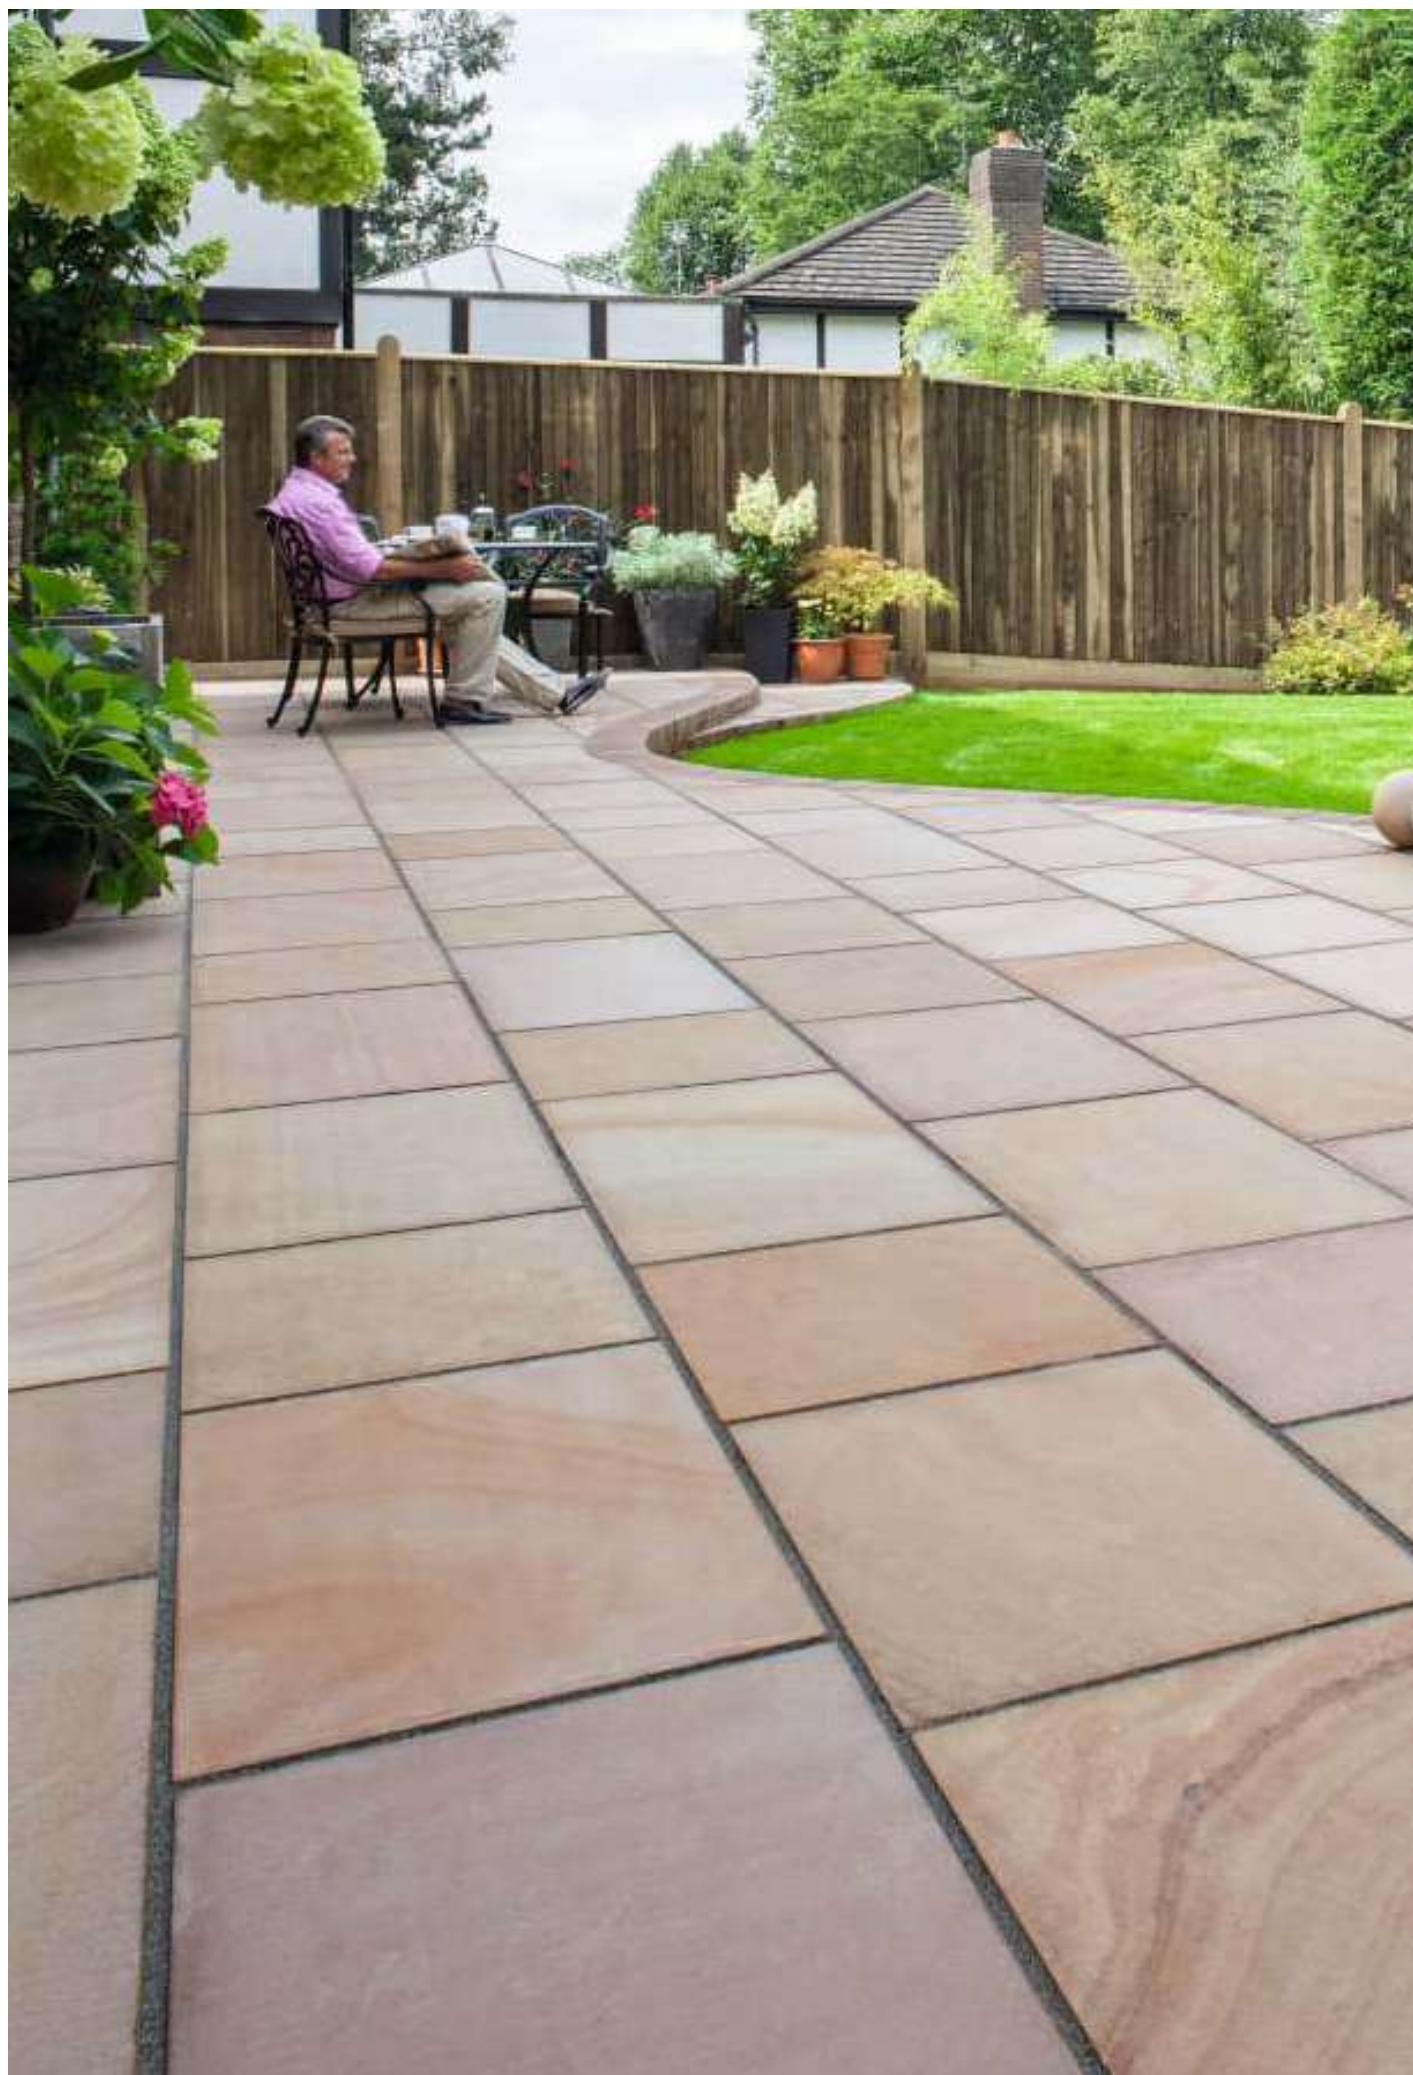

Eco-Friendly

When it comes to sustainability, stone is a top choice. Not only is it made from natural materials, it is also recyclable and non-polluting. Its eco-friendliness extends to its production process as well - no chemicals are needed to create this beautiful and durable material.

Types of Stones

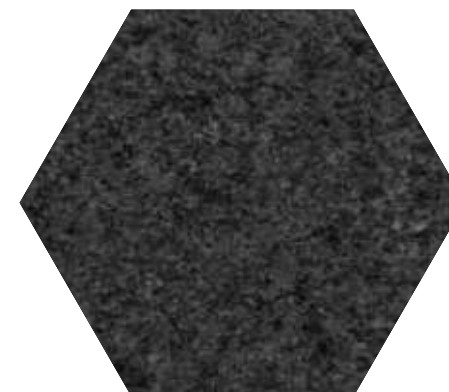

Sandstone

One of the strongest natural stones on earth

Limestone

Brings incredible versatility to spaces

Granite

Creates compelling home accents and features

Experience the strength and beauty of quartzitic sandstone with us.

Sandstone

We specialize in quartzitic sandstone - a type of sandstone that is highly prized for its strength, durability, and unique beauty. Quartzitic sandstone has been subjected to more extreme heat and pressure over a longer period of time than regular sandstone, resulting in a material that is harder and more durable. Its interlocking quartz grains give it a smooth, dense surface that is resistant to scratches and stains, making it an excellent choice for flooring, countertops, and other high-traffic areas.

Quartzitic sandstone also boasts a wide range of colors and patterns, ranging from warm, earthy tones to cool, sophisticated shades. Its natural, subtle patterns and textures make it a versatile choice for any design style, and its timeless appeal means it will never go out of fashion.

Physical Properties

Quartzitic sandstone is a technical strength powerhouse, thanks to its interlocking quartz grains.

Compressive Strength

Colours

From warm, earthy tones to cool, sophisticated shades, our selection of sandstone is sure to have something to fit your style and preferences. Whether you are looking for a bold, statement-making colour or a more subtle, neutral hue, we have you covered. Our natural sandstone comes in a range of shades, from classic beiges and tans, to rich, deep reds and browns. No matter what color you are looking for, our expert team can help you find the perfect match for your project.

Aviana

Aviana sandstone is known for its cool, neutral color. Its colours range from light, airy shades to deep, charcoal tones, our selection of grey sandstone is sure to have a color to fit your style and preferences. This versatile material is perfect for creating a sleek, modern look and can be used in a variety of settings, from traditional to contemporary.

Colours

India is known for its rich and diverse range of granites. One of the most popular varieties from North India is the Black granite. It is a solid black colour, with a fine-grained and consistent pattern, making it a perfect choice for both contemporary and traditional designs. Indian granites are renowned for their durability, heat resistance, and natural beauty, making them a perfect choice for any project.

Ultimo

A black granite with a deep, rich hue and consistent pattern. Highly sought-after due to its durability and resistance to heat, Ultimo is a popular choice for countertops, walling, flooring and other high-traffic areas. Its unique fine-grained pattern gives it a timeless and classic aesthetic that will complement any design.

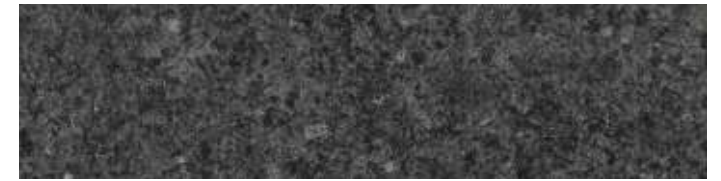

Surface Finishes

◆ Finishes for Diamond Sawn Stone

Ultimo Blasted

Ultimo Blasted + Waterblasted

Ultimo Flamed

Ultimo Polished

Edge Finishes

Ultimo Chamfered

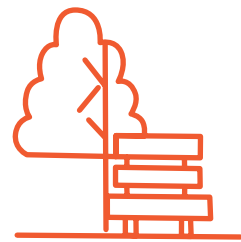

Ultimo Bullnose

Ultimo Rockfaced

Usages

Because of its durability and resistance to harsh weather conditions, Granite is a popular choice for a wide range of applications. From countertops and flooring to walling and sculptures, granite has proven to be a versatile material that can be used in both indoor and outdoor settings.

Care & Maintenance

Maintaining the beauty of natural stone is a very easy process. To clean, simply wipe down the surface with a damp cloth and mild detergent. Avoid using any acidic or abrasive cleaning products as they can damage the surface. Dusting on a regular basis is also important to keep the natural stone looking polished and clean. With these simple care steps, your natural stone can continue to add elegance to your space for years to come.

Sweep away dirt and detritus regularly

Pull out weeds from outdoor paving

Use a stiff brush to remove hard particles

Use PH neutral cleansers

How to Order From Livingstone?
